Advanced Services

Zoom's Advanced Services consulting and deployment guidance can help you tackle complex and custom deployments that may require assistance from a Zoom solution consultant or systems architect. Our in-house experts have extensive experience implementing advanced setups in unique environments that require special solution designs.

Services

Advisory

The Zoom Advanced Services team provides advice on architecture and design considerations, consultations on how to maximize the Zoom platform and features, as well as migration considerations.

Deployment Consulting

The Zoom team also offers consulting for your implementation strategy including a needs assessment followed by design development, plus strategies for efficient deployment and migration.

Guided Deployment

Zoom also helps guide your deployment by developing a detailed project plan for your implementation. This is especially helpful for projects that require extra attention like multi-site and custom deployments.

Services	Advisory	Deployment Consulting	Guided Deployment
Platform features (SSO, Security, etc)	✓	✓	✓
Network & Firewall Consideration	✓	✓	✓
Integrations/Interop (Calendar, 3rd-party solutions, etc)	✓	✓	✓

Custom Consulting Services

The Zoom Advanced Services team provides a wide variety of services to help solve any technical challenges you may run into — even if they aren't listed in the services above. Feel free to reach out to your Zoom Account Manager or Global Services Specialists to request an Advanced Services expert assessment for your unique needs. Together we can customize the best service for your Zoom deployment.

Zoom Advanced Services is here to help you make complex deployments easier with technical experts.
